

Färglägg ditt periodiska system – lista

Detta material används i övningen "Färglägg ditt periodiska system"

Ac aktinium (actinium)

Ag silver

Al aluminium (aluminium [UK], aluminum [US])

Am americium

Ar argon

As arsenik arsenic

At astat astatine

Au guld gold

B bor boron

Ba barium

Be beryllium

Bh bohrium

Bi vismut (bismuth)

Bk berkelium

Br brom (bromium)

C kol (carbon)

Ca kalcium (calcium)

Cd kadmium (cadmium)

Ce cerium

Cf californium

Cl klor (chlorine)

Cm curium

Cn copernicium

Co kobolt (cobolt)

Cr krom (chromium)

Cs cesium (caesium [UK], cesium [US])

Cu koppar (copper)

Db dubnium

Ds darmstadtium

Dy dysprosium

Er erbium

Es einsteinium

Eu europium

F fluor (fluorine)

Fe järn (iron)

Fl flerovium

Fm fermium

Fr francium

Ga gallium

Gd gadolinium

Ge germanium

H väte (hydrogen)

He helium

Hf hafnium

Hg kvicksilver (mercury)

Ho holmium

Hs hassium

I jod (iodine)

In indium

Ir iridium

K kalium (potassium)

Kr krypton

La lantan (lanthanum)

Li litium (lithium)

Lr lawrencium

Lu lutetium

Lv livermorium

Mc moskovium (moscovium)

Md mendelevium Svenska Engelska

Mg magnesium

Mn mangan (manganese)

Mo molybden (molybdenum)

Mt meitnerium

N kväve (nitrogen)

Na natrium (sodium)

Nb niob (niobium)

Nd neodym (neodymium)

Ne neon

Nh nihonium

Ni nickel

No nobelium

Np neptunium

O syre (oxygen)

Og oganesson

Os osmium

P fosfor (phosphorus)

Pa protaktinium (protactinium)

Pb bly lead

Pd palladium

Pm prometium

Po polonium

Pr praseodym (praseodymium)

Pt platina (platinum)

Pu plutonium

Ra radium

Rb rubidium

Re rhenium

Rf rutherfordium

Rg röntgenium (roentgenium)

Rh rodium (rhodium)

Rn radon

Ru rutenium

S svavel (sulfur)

Sb antimon (antimony)

Sc skandium (scandium)

Se selen (selenium)

Sg seaborgium

Si kisel (silicon)

Sm samarium

Sn tenn (tin)

Sr strontium

Ta tantal (tantalum)

Tb terbium

Tc teknetium (technetium)

Te tellur (tellurium)

Th torium (thorium)

Ti titan (titanium)

Tl tallium (thallium)

Tm tulium (thulium)

Ts tenness (tennessine)

U uran (uranium)

V vanadin (vanadium)

W volfram (tungsten)

Xe xenon

Y yttrium

Yb ytterbium

Zn zink (zinc)

Zr zirkonium (zirconiu
